Task in Looping

1. Write a program for prime number using while loop.
2. Write a palindrome program for string and number using while loop
3. Write a program for Armstrong number using while loop and check the number is Armstrong or not
4. Write a program for Evil-Odious Number using while loop
5. Write a program to count the digit in a Number using while loop
6. Write a program for LCM using if condition and while loop
7. Calculate the sum of first ten numbers using while loop
8. Write a Fibonacci series program using for loop
9. Write a program for prime number between 1 to n using for loop.
10. Write a program for random number generator using for loop
11. Write a program for first 5 multiplies of 6 in while loop using break.
12. Write a program to display only those numbers from a list that satisfy the following conditions

   - The number must be divisible by five

   - If the number is greater than 150, then skip it and move to the next number

   - If the number is greater than 500, then stop the loop

13. Write a program Print list in reverse order using a for loop
14. Use a for loop to display elements from a given list present at odd index positions
15. Python program to convert the month name to a number of days.
